

RJ11-S110P1 patch-cord

Product Code: [LAN-11-P1-Xm](#)

RJ11-S110P1 patch-cord

Description

Patch cords are designed for manual connection of various SCS cable links to each other.

The cords are made of a single-pair cable with stranded conductors, at one end of which a single-pair 110-type plug is installed, and at the other end an RJ-11 plug. The advantage of these cords is the ability to connect to any single pair on the 110 cross-connect.

Patch cords provide high connection reliability and allow, if necessary, to quickly re-connect links.
