

Assembly pad for LANMASTER's field installable optical connector

Product Code: [LAN-FMC-GR](#)

Assembly pad for LANMASTER's field installable optical connector

Description

The pad is designed for terminating LAN-FMC-SC field installable optical connectors.

The assembly pad has notches and grooves for proper placement of the connector retainer and fiber optic drop cable.

The pad has marks for indicating the correct fiber length before cleaving.

Field installable optical connectors allow fast termination of single-mode optical fibers used in FTTH networks.

Terminating the connector on the fiber is done without using a fusion splicer and does not require polishing the end of the ferrules.
