LANMASTER LSZH FTP cat. 6 patch-cord

Description

Patch cords is category 6 and fully comply with ISO/IEC 11801 standards.

The patch cords are made of shielded stranded cable with a separator and shielded Category 6 RJ-45 modular plugs.

The material of the jacket and the molded boot of the patch cord is low-smoke halogen-free PVC - LSZH (Low Smoke Zero Halogen).

The junction between the RJ-45 plug and the cable is filled with a plastic to ensure a strong connection between them, such a connection is called molded.

Special side ribs are provided at the molded part of the plug to protect the locking latch of the RJ-45 connector from damage and breakage. This solution does not interfere with pressing the latch.

The plug has flexible strain relief boot, which provides a given cable bending radius during operation.

Each patch cord undergoes mandatory testing for the integrity of electrical circuits, the absence of a short circuit and the correct wiring.

Continuous shield provides reliable protection of the patch cord from electromagnetic interference.

Patch cords are available in various lengths:

- 0.5 m
- 1.0 m
- 1.5 m
- 2.0 m
- 3.0 m
- 5.0 m
- 7.0 m
- 10.0 m
- 15.0 m
