

110 type connecting block

Product Code: [LAN-S110C-x](#)

110 type connecting block

Description

The connecting blocks are installed on the posts of the 110 wiring block base after punching cable pairs on it.

Cable wires conductors can be solid or stranded 22-26 AWG ($\varnothing$ 0,64-0.40 mm).

The block contains 4 or 5 pairs of X-shaped metal contacts.

The black plastic insert is marked with the manufacturer's label.

The connecting block has IDC contacts on the side facing the wiring block. The blades of the contacts cut the cable conductors with the help of punching tool to provide reliable contact. And the block is fixed on the base of the wiring block. There are 110 type connectors for connecting patch cords or jumper pairs on the other side of the connecting block. Colored marks are applied on the connector block for labeling purpose: blue, orange, green, brown.

Supplied in 10 blocks packs.

Model range
