

Desktop grommet box for two Keystone modules and one power socket with 1.8 m cord, black

Product Code: [LAN-WA-MCTA-20K+G](#)

Desktop grommet box for two Keystone modules and one power socket with 1.8 m cord, black

Description

The desktop grommet box is designed to organize one workplace with a standard minimum set of sockets.

The slots in the grommet box are suitable for Keystone format modules (see compatible items).

With the help of this grommet, you can organize a quick and convenient connection of mobile workplaces. For quick connection of the workplace, it is recommended to use LAN-KCP45Uxx or LAN-KCP45Sxx connectors. They are designed to connect two patch cords equipped with RJ45 plugs. If it becomes necessary to quickly deploy the user's workplace, it will only be necessary to connect the module with a patch cord to the nearest information outlet, for example, in the floor hatch box.

Thanks to this feature, the grommet boxes are a convenient solution when organizing connections in a meeting room or in a conference room.

The box has a 1.8-meter power cord for connecting to a fixed power socket.

The grommet lid protects the interior from dust, dirt, and foreign objects.

The box is easy to install. A box body is installed in the tabletop, a plastic ring is screwed onto the thread of the body from the bottom side thus fixing the box in the

tabletop.

Specifications:

Material	ABS / PC
